ACCESSORIES AND FIXING METHODS

VARIANTS

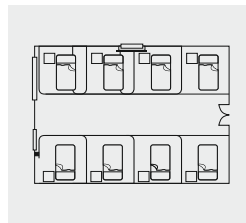

Luxe Track:
Elegant track system for low usage area with easy slide system.

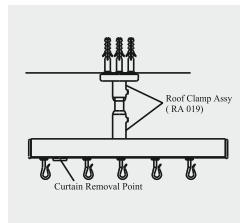

Supreme Track:
High quality track system with premium rollers ensures effortless movement, time after time.

TYPICAL LAYOUT

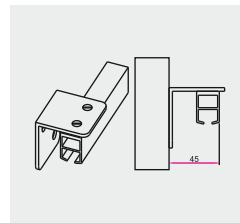

Ideal for high usage in typical hospital/clinic wards.

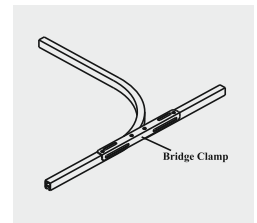

FIXING METHODS & ACCESSORIES

Roof suspensions made from die casted aluminium provides enhanced strength. Height can be customised as per requirement.

Side wall brackets are made from aluminium for strongly securing the track parallel to the wall.

Bridge clamps effortlessly manage the high stress of the T junctions.

Patient privacy is one of the most crucial factors in a modern hospital design. SIOF helps you achieve the perfect balance between design and functionality with its reliable Hospital Cubicle Track Systems that combine the best of strength, flexibility and quality.

With a 60 years legacy of delivering value, you are assured of products to fit your interiors with impeccable quality, innovative solutions and timely delivery.

WHY YOU SHOULD RELY ON SIOF HOSPITAL CUBICLE TRACK SYSTEMS.

- ✔ Rigid, high-grade aluminum profile with a 3 mtr. span.
- ✔ Die cast aluminum wall fittings for extra strength.
- ✔ Roller Type Runners for free-running curtains and zero maintenance.
- ✔ Slim in appearance, extra strong in performance.
- ✔ High value for money.
- ✔ Assured support of experienced installation and service teams.
