# SIO Revolving Doors.

SIO revolving doors are technically refined and noiseless in operation. Equipped with two, three or four leaves, with or without a display case and night-shutter, they are available in sizes up to 7500 mm in diameter. Virtually any combination of features is possible.

Our very wide range of design options gives planners and architects maximum flexibility in designing their entrances. The drive is fitted into the ceiling or invisibly under the floor, in any RAL color or anodized finish, or all glass model, which has especially transparent aesthetics.

To enable easy access to wheelchair users and walking disabled, SIO revolving doors can be fitted with a switchable control to reduce the speed. Also exemplary is the high level of safety. All doors can be used as emergency escape routes, and work as additional escape support.

## REVOLVING DOOR MODELS

### SIO 2 LEAF REVOLVING DOORS

- The internal diameter can be chosen by the customer
- Maximum flow of up to 80 people per minute
- Suitable for wheelchair users and shopping trolleys
